## Introduction

I love to code. It is the perfect platform for blending my logical and creative strengths. I taught myself the basics of programming on Khan Academy while in elementary school. I took every programming class offered in junior high and high school. My high school experience peaked in opening the world of programming to other girls as President of Girls Who Code and building a dynamic website for Summit County Recreation.

## Education

Brigham Young University – Provo, UT

Anticipated Graduation: April 2026

- B.S. Computer Science, 3.86 GPA
